

MANOIR INDUSTRIES

High Performance 6300 tons workshop

6300t Press

The new Manoir Aerospace 6300 t production workshop, installed in Bologne, production start-up February 2011, is designed for aerospace critical components, fulfilling the highest metallurgical requirements:

- Engine discs
- Engine blades, vanes and fan blades
- Aircraft critical structure and equipment parts

The new workshop includes:

- Fully monitored 6300 t screw press combined with a 2000 t preforming hydraulic press
- High temperature ovens for specific aerospace titanium and nickel base alloys superalloys and all aluminum grades
- Integrated tooling quick change over system increasing the workshop efficiency performances

Sustained by Manoir Aerospace reknown expertise and specific R&D programs, this new high performance workshop is a competitive solution for your most critical forged components.
